

## Cable Kit 3166/02 Interface 3009/52

### SoftLine For Icom IC-A120

#### Remote functionality

This cable kit will together with the Mimer Network Interface give remote control of the radio's audio and PTT functions.

The kit is designed to connect a radio in a SoftLine system. At the other end of the system there can be another radio, of the same type, or another type to make a cross patch, or there can be a simple microphone and speaker. See next page for examples.

#### Radio programming

No special programming is needed in the radio.

The volume control knob shall be set for 50% volume. This is when the knob points straight up (12 o'clock).

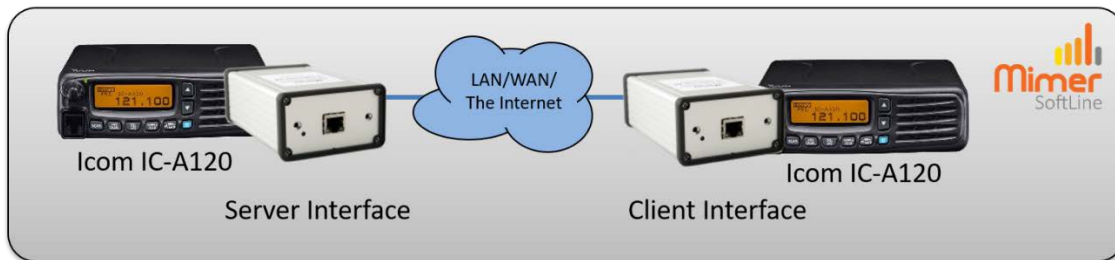

#### Cable Kit

The red and black wires shall be connected to 12VDC, red is positive.

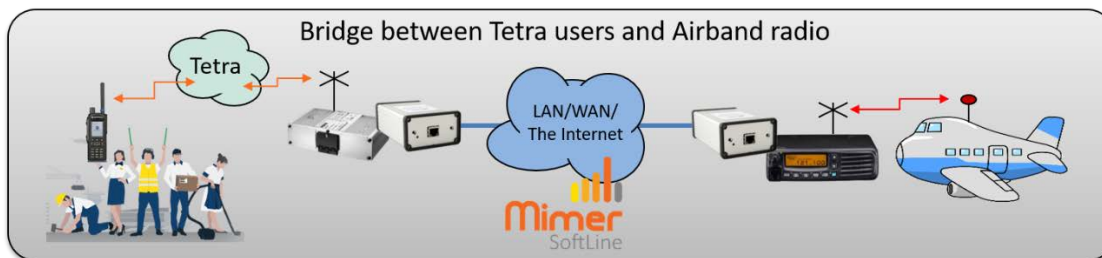

The network interface consumes max 0,3A.

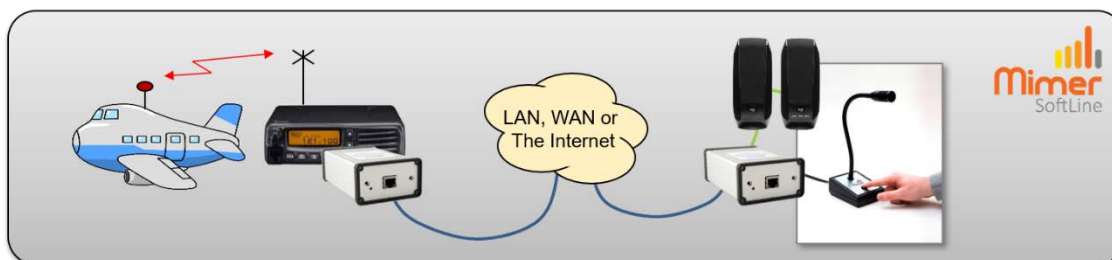

*Cable Kit 3166/02*

*Connecting two radios of the same type back-to-back for extended coverage.*

*Connecting two radios of different type back-to-back for cross patching.*

*Connecting a radio at one end with a microphone and speaker at the other end, for remote control without using a PC.*
